To parents/guardians, because teens will have access to online resources, we recommend discussion about online activities with them. This could include a reminder that teens should not save personally identifiable information such as full name, home address, Social Security number, telephone number, e-mail address, plus photographs, videos, audio, and other files that they do not want everyone to have access to on ARTLAB+ equipment/computers. Lastly, Smithsonian computers are monitored; users have no expectation of privacy.
